

Phase 10: Final Presentation & Demo Day

The final phase focuses on presenting the **Govt Schemes Management System** to stakeholders, demonstrating its functionality, gathering feedback, and preparing documentation for future reference or portfolio showcase.

Pitch Presentation

- Prepare a **concise presentation** highlighting the objectives, scope, and benefits of the project.
 - Key points to include:
 1. **Project Overview** – Purpose: To automate the process of citizen scheme applications and officer verifications.
 2. **Problem Statement** – Manual tracking of applications caused delays and errors.
 3. **Solution** – Salesforce-based system for citizens and officers via Experience Cloud portal.
 4. **Key Features** –
 - Citizen portal for submitting applications
 - Automatic record creation in Scheme Applications
 - Officer verification workflow
 - Email notifications and alerts
 - Reporting & dashboards for officers and admins
 - Include screenshots or mockups of the portal, forms, and dashboards.
 - Present the **architecture diagram** showing objects, flows, and automation.
-

Demo Walkthrough

- Perform a **live demonstration** of the application:
 1. **Citizen Submission** – Show how a citizen logs in and submits a scheme application.
 2. **Officer Verification** – Display how an officer receives, verifies, and updates the application status.
 3. **Notifications** – Demonstrate email alerts for approval/rejection.
 4. **Reporting & Dashboards** – Show dashboards and reports filtered by roles (officer sees all, citizen sees only their own applications).

- 5. **End-to-End Flow** – Emphasize automation, record updates, and real-time visibility.
 - Highlight **user-friendly UI** and mobile/desktop compatibility.
-

Feedback Collection

- Gather feedback from stakeholders, including project mentors, instructors, or end-users.
 - Use structured forms or surveys to record feedback on:
 - Usability of citizen portal
 - Accuracy and completeness of verification process
 - Reporting/dashboard clarity
 - Overall system performance and security
 - Summarize feedback for potential enhancements in future iterations.
-

Handoff Documentation

- Prepare comprehensive **handoff documentation** for future developers or administrators. Include:
 1. **Object Model & Relationships** – Scheme, Scheme Applications, Citizen, Officer.
 2. **Automation Details** – Flows, Process Builder, Email Alerts, Apex classes.
 3. **Experience Cloud Pages** – Portal pages, forms, and navigation details.
 4. **Security Configuration** – Profiles, permissions, sharing settings, FLS.
 5. **Reporting & Dashboards** – Summary of reports and dashboards with filters.
 6. **Known Issues & Limitations** – Any areas for improvement or enhancements.
 - Provide links to **metadata**, **code repository**, and deployment instructions if needed.
-

LinkedIn / Portfolio Project Showcase

- Highlight the project as a **professional showcase** for your portfolio:
 - Include a **brief description** of the system and its impact.
 - Mention technologies used: **Salesforce, LWC, Apex, Experience Cloud, Flows, Reports & Dashboards**.
 - Share screenshots or demo video links.

- Emphasize your role and contributions in the project (design, development, testing, deployment).
 - Showcase problem-solving skills, automation implementation, and reporting features.
- Update LinkedIn, GitHub, or personal portfolio with a **short video walkthrough** or screenshots to demonstrate practical experience.

The Github link for all documentation is

<https://github.com/Achchitha123/govt-schemes-management>

Outcome:

This phase ensures that the **Govt Schemes Management System** is formally presented, evaluated, and documented for future use. Stakeholders clearly understand the system's functionality, and the project is ready to be showcased as a professional achievement.
